

## Combination Pliers, Insulated

Klein Tools Electrician's Insulated Combination Pliers are 1000V rated and VDE certified for safety on the job. The multi-color, sleek design with small thumbguards make for easy handling and storage. The three-part insulation with white underlayer provides a warning sign that insulation may be compromised. The durable, molded insulation meets or exceeds IEC 60900 and ASTM F1505 standards for insulated tools. These pliers feature a high-leverage design, with the rivet closer to the cutting edge for 40% greater cutting and gripping power than other pliers designs.

### Specifications
