

## LAN Scout® Jr. Continuity Tester

This easy-to-use, compact tester saves time and money on the job. The LAN Scout® Jr. tests continuity on twisted pair data wiring connections. An integrated tone generator supports multiple tones and control of the pins carrying the tone. The self-storing remote makes this tool easy to store and locate.

### Specifications

|                                  |                                |                                       |                         |
|----------------------------------|--------------------------------|---------------------------------------|-------------------------|
| <b>Type:</b>                     | Twisted Pair, DATA, Voice, LAN | <b>Special Features:</b>              | LED Response            |
| <b>Cable Type:</b>               | CAT3, CAT5/5e, CAT6/6A         | <b>Overall Length:</b>                | 9.5" (24.1 cm)          |
| <b>Overall Height:</b>           | 4.609" (11.7 cm)               | <b>Overall Width:</b>                 | 2.297" (5.8 cm)         |
| <b>Material:</b>                 | Plastic and Stamped Metal      | <b>Test-n-Map ID Remotes:</b>         | 1                       |
| <b>Batteries:</b>                | 4 x LR44                       | <b>Multiple Style Tone Generator:</b> | Yes (4)                 |
| <b>Test &amp; Measure Types:</b> | Voice, Data, RJ45, RJ11        | <b>Included:</b>                      | 6 x 1.5V LR44 Batteries |
| <b>Weight:</b>                   | 4.0 oz (116 g)                 |                                       |                         |
